Comments: Hi,

I am a registered nurse and work at the hospital in McCall. The DEIS does nothing to address the impacts on the hospital. We are a small Critical Access Hospital with limited resources and capacity. I am concerned that these resources and capacity will be stretched past our limits due to the inevitable danger in opening and running a mine in such a rural area. In addition to injuries incurred during mining operations I am also worried that the large influx of workers would put a huge strain on local infrastructure (including Cascade Medical Center and St. Luke's McCall) that was built with only the small population of Valley County in mind. Thanks for taking my comment.
