Comments: I support Alternative 5: the NO Action Alternative.

I am a life-long Idaho resident. I chose to live here because of the public land. I do NOT expect the Federal Government to give away our resources to anyone that has a few bucks. The Federal Government is supposed to be the caretaker of the public land for future generations!!! NOT to sell off our treasures!

The possible harm to the land as well as Idaho's fish is certainly not worth the risk. There are people's jobs and businesses that would be affected by any of the possible disasters that could occur if this project were approved.

Idaho and all we have here...the open land, pristine rivers and creeks, the recreational opportunities are huge treasures to protect NOT sell.

The Stibnite Mine Project should be denied!
