Comments: To Chief Vicki Christiansen

Dear USFS,

I'm Here in regards to the the Midas Gold's Stibnite Gold project on the South fork Salmon river. I want to be clear and ask for a supplemental DEIS that is very much needed because the current one is incomplete with a lot of missing information, and further, with its current content I am advocating for Alternative 5, no action. We must extend the public commenting because of the countless pages to go through but most importantly the gaps/missing critical information that the public has the right to be informed on.

Sincerely,

Adam C Spillman
