Last name: Beckley

Organization:

Title: Therapise

Comments: I'm writing to you as a former Idaho river guide, and lover our nation's incredible public lands. When I heard about the Stibnite Gold project and the resulting environmental impact due to tailings, arsenic, and other tragic side effects, I was speechless. I kayaked the South Fork of the Salmon River back in 2008, and it was truly a life changing experience. I understand not everyone has the opportunity or interest to do so, but I would like to see this place protected from mining and other detrimental activities forever. so that the natural environment is intact and available for generations to come to visit and be inspired.

Wilderness is a necessity for our soul. As a true lover of Idaho, I urge you to please take aggressive action to stop this project IN ITS ENTIRETY. Thank you.
