Comments: The Stibnite Gold Project is a win-win for Idaho. It will be a boost for the local economy (LIE) while also helping repair the environment (LIE) in an abandoned mining district. Midas Gold will use modern mining to create more than 500 (Maybe a 100 CDL jobs locally) direct long-term, family-wage (boom& bust) jobs and improve water quality, reconnect salmon passage and correct many other legacy issues at the site. Additionally, the project will decrease U.S. reliance on China and Russia (Hysterical America first lies) to provide out nations supply of antimony, one of 35 minerals deemed critical for national security and supply chain independence by the U.S. Department of Commerce. This is hysterical- the China-Russia thing especially since China has the only antimony smelter system operating in the world today. Where is the antimony going from Stibnite to be processed? CHINA, which will be easier when Midas secures the permits (lots of graft here) and sells the mine to a chinese mining co. PC114
