Title:

Comments: We have resided in Valley County since 1984 and enjoy hiking and fishing in the area affected by the proposed minus gold mine operation.

I have read the D EIS and have followed the proposal for years period the tradeoff between the environment and profit is a no brainer. The operation is negative impact on wildlife, fish, water quality and the quality of life in Valley County should cause the US Forest Service not to approve the Midas application. Resist public pressure from economic interests please turn down the mining operation.
