Comments: If Midas Gold Idaho is allowed to move forward with the Stibnite Gold Project, they will reclaim an area impacted by historical mining, create hundreds of wellpaying jobs and provide a huge boost to our economy in the process. It is a winwin for Valley County. We need to permit the project.

The Stibnite Gold Project is good for the Idaho workforce. Midas Gold's strong commitment to hiring locally and using local vendors and suppliers helps build our economic base. I am sure they have already spent hundreds of thousands of dollars in this region and they haven't even started mining. The salaries of the positions at the Stibnite Gold Project will be approximately two times higher than typical jobs in Valley County. The financial security and on-the-job training opportunities these positions bring has the potential to bring meaningful change to families throughout the region. Additionally, we know mining brings more than jobs and robust wages to our state, it promotes the development of secondary businesses and the production of more goods and materials right here in Idaho.

After reading my letter, I hope you can see why you should permit alternative 2 of the Stibnite Gold Project. This project is a good thing for Idaho, helps decrease America's dependence on foreign countries for critical minerals and cleans up the environment. These benefits cannot wait. Sixty days is long enough for the comment period.
