Title:

Comments: I work for a union mining company, and I have seen for many years that modern mining is very careful to protect the environment while providing America with critical minerals which help provide our way of life with comforts and conveniences.

The Stibnite Gold Project will be a win-win for Idaho! Environmental damage from the "old way" of mining will be corrected AND Idaho will gain jobs. Not to mention, our national security will be improved with the mineral secured by this project.

I support the Stibnite Gold Project.
