Title:

Comments: I Have lived in Yellow Pine since Oct 2000. I chose the village because of the beauty and remoteness. I have grown to feel so proud of the mining history of the area. I feel I am an environmentalist but I also appreciate that wood from the forest as well as minerals from the earth are necessary to improve our quality of life & can be taken from the earth wisely. I am impressed by the Stibnite Midas Gold plan to reclaim the site. I am aware it will be an open pit. I am concerned by the hazards from previous mining & believe Midas can improve the situation. I definitely choose Alternative 2.
