Title:

Comments: I am presently working on a mine in Eastern Idaho. I live in southwest Idaho and commute every week. I different in the Economy is astounding. I couldn't survive on the income at home. TO be able to see a community come out of poverty to a place with little to no unemployment is a huge asset any place in Idaho.

I see first hand the EPA guidelines that mines must stand by, anyone that might be concerned with the Environmental Impact should not be. THEY make sure it comes first. I only wish I had this opportunity close to my home. I believe it is nothing but positive.
