Comments: South Red Bird Wildlife Enhancement Project

To whom it may concern,

Please reconsider the logging plan for the Daniel Boone National Forest! The beauty of the trees and mountains is a national treasure and source of pride to all who see it. As you are entrusted with the management of these forests, I truly hope that you can find a less destructive way to ensure the health of the forest. To continue with these plans would be devastating to so many.

Thank you for your concern,

Karen Squire
