Comments: South Redbird Wildlife Enhancement Project

Good Afternoon,

This email is in response to the proposed planning of the South Redbird Wildlife Enhancement project. I have reviewed the proposal, and even seen pictures of previous "enhancement" projects with skid trails, landslides, foliage dumped down hills, etc.

As a Kentuckian, a taxpayer, and someone who loves the natural resources our forests provide, I ask that the project is reconsidered.

There are old growth forests in that area. The species of trees in that area, native to Kentucky, are thriving, and are home to many different species.

I feel we must protect our natural habitats and environment. The advantages our forests provide our Commonwealth are unparalleled. I humbly ask the US Forest Service to re consider the South Redbird Wildlife Enhancement Project.

Respectfully Submitted,

Todd Burton
