Comments: To CNF,

I am opposed to opening the road in John Long Canyon due to immediate and long-term impacts on sensitive wildlife and plants, on Threatened and Endangered Species, and the increased threat of invasive species and fire

* if a second road into Horseshoe Canyon is constructed, the existing road should be closed at the forest boundary.

I relish the quiet and remote and untouched quality of the Chiricahua. I believe an influx of motorized vehicles would disturb wildlife and plant life in this area.

Please strive to keep these areas free of more cars and RV and ORV's.
