Comments: Hi Meg!

I am wondering if you will be able to address whether the proposed Road's End Campground closure and decommissioning will also include a Forest Order closure for camping? I applaud the District's recognition that use of this campground poses a threat to the Twisp local population of bull trout, but without a closure order, dispersed camping and use could still occur, thus not removing the disturbance threat to bull trout that has lead to bull trout mortality (Draft EA, p. 64).

Thank you,

-Cindy
