Comments: To Whom it may concern,

I am strongly opposed to implementing this plan with out rigorous examination in front of the citizens most impacted by it. The scope and sheer size require thorough airing of the objectives in the court of public opinion.

There is an apparent disconnect regarding cutting down trees upwards of 30". If they are deficient in the area cited doesnt that fly in the face of the

forest Service's aim for a 'Restoration Vision'? If the aim is to preserve and protect this natural environment then this appears to me to be a classic 'Catch 22',scenario. It just doesn't make sense.

Finally , the ATV roads plan is in no way compatible a forest restoration project and needs to be considered as a separate issue. This is highly impactful to the area that this project effects. It is way to important to be an addon to a Forest restoration project and in fact is an oxymoron in the context of this proposal.

Thank you for your consideration of my opinion.
