Title:

Comments: My husband and I moved to McCall in August 2020. While we love living here, we have two key observations that make it difficult: limited indoor community center for events as Cascade even has the indoor pool and fitness center. Secondly, the internet has always been a problem for us as we live in the county and because of our distance from the city, there is no underground cable, so we must rely on wireless. To this end, we have been using Frontier for years, which has been particularly frustrating as it only works 50% of the time. As a result, our children who work remotely, cannot visit and work in McCall because they rely on good internet/wireless service. We have many friends who have partially retired and would love to spend more time in McCall at their second homes, but cannot because of the poor internet/wireless service--as they also rely on wireless/internet communications for their part-time/remote work. This impacts local business as well, as they would benefit from more of the population spending more time in McCall. We have often considered selling our property and moving to Hailey or somewhere else where there are fitness centers and most importantly, great internet/wireless service! We are in full support of adding these new towers as they will improve communications for local residents and may impact life and death when local community members rely on wireless for emergency services as well.
