Title:

Comments: no rights to children or grandchilddren in leases on national publi c land owned by 330,000,000 americans. no rights at all. when the person dies, thats it. and they need to be off our national land soon, very soon., we are sick of robber baron cattle ranchers taking over and shooitn our wildlife and letting them have no peace on our national land. no easments for them on national land either. that needs to be shut down. national land is national land ownedy by the public trust which has existed in our laws since I500 ad. for unauthroized use, a million dolalrs a day shoujdl be the fine. get all grazing robber baron cattle ranchers off our national land. now. enough is enough. they have robbed us all long enough. no informal disputes by this captured agency that only works for the robber baron cattle ranchers. you are not representing the general american public at all. you have been a captured agency working only for the cattle ranchers. the us public wants the court to hear disputes. this has been a real theft from the american people.
