Title:

Comments: I am a local area resident in Juneau Alaska and I support Coeur Alaska expanding the Kensington Mine. I believe that they can do so safely without harming the local environment. Kensington mine is one of the largest private employers in the area and many local area residents work at the mine. I believe it is better to have a mine operating here in the United States under great oversight with strict environmental mitigations in place, providing local jobs, and producing the commodities the world needs rather than going to a poor third world country where there will be greater harm done to the environment due to less stringent mining laws.

Thank You
