Comments: I can't. Believe the forest service has forgotten people who have limited income. The ochocos are for many a place where they go to vacation to see the horses because of limited funds, income or resources to vacation and see the beautiful horses. Great away to acknowledge the poor, handicapped, and the veterans. My family has grown up with these horses and now you plan on limiting them. You never considered the poor, the handicap or anyone else. You people work for us. We don't work for you. You Cant even keep the one bathroom clean, the people are doing damage not the horse's . Quads and sides by sides are destroying the riparian areas.. you people need too drive around and be more observant. The fact that your plan has no proven scientific data is appalling. You did not make any objections to my comments so, guess all of them were valid points.I question if you even read my comment, because I explain my concern over low income people.
