Title:

Comments: Below are my concerns / comments regarding the Mill Creek Restoration Project:

1. The area involved in the proposed Lemon gulch trail network is preserved by: (a) preserving or enhancing scenic views, (b) maintaining the natural appearing character of this proposed recreation area, (c) protecting trees as necessary to ensure visual quality
2. The area around Steins pillar and the Steins pillar trail are protected by: (a) preserving or enhancing the scenic views, (b) ensuring veg management activities are not visually evident along the trail corridor, (c) the setting of the trail corridor remains scenic and natural appearing, (d) legacy trees along trail corridor are preserved
