Comments: Eireann,

Thanks for helping me with ArcGIS. A good resource.

Regarding the public meeting, I ended up as a phone participant, which was almost useless, especially the first half. The use of acronyms and the lack of visual cues as to what was being discussed left me lost. For instance, it took me a while to figure out what "EA" meant. And all the references to page numbers and maps went beyond me since I had no "EA.". I finally found several documents under the "Analysis" tab on the USDA Twisp Project website. But I couldn't bounce around between these 5 documents to keep up with the meeting.

The question section was much more coherent and understandable.

You are right. An in person meeting would have been much better. If further meetings are held with phone call in, please provide the documents ahead of time, and realize that some of us are not professionals in the field and need help with forest service jargon.

All that said, I am very supportive of yours and the Forest Service's efforts to improve the health of the district.

Thanks, David.
