Comments: Dear Forest Supervisor Kristen Bail c/o Eireann Peterson,

I'm writing to provide comments on the Twisp Restoration Project environmental analysis #56554.

Please do not ignore the scientific work and public sentiments and efforts that support the restoration strategy originally developed by USFS. It addresses environmental resiliency and resource management in a way that makes sense in our changing world. The changes proposed to this original strategy focus on short term profit that, once completed, alters our landscape forever. Making an extra dollar now does not warrant an unhealthy and depleted landscape, for us and for the critters forever. Do we really want to leave a ravaged landscape for our future generations or do we want to show them we analyzed the monetary gains with the environmental impacts and came up with a plan for both to succeed but not at the expense of one or the other? Stop this shortsightedness of profit over our health.

Thank you for the opportunity to comment on the Twisp Forest Restoration Project.

Regards,
Jane Zillig
