Title:

Comments: I am a recreational sport shooter, hunter, and forest user for a range or recreational activities. I also frequently use a recreational residence in the Clyde Summer Home Group proximate to upper Gold Camp Road and Forest Service Road 376 in the Pikes Peak District.

With increased forest visitation, I believe any activity with extensive participation on public lands should be managed to preserve resources and reduce user conflict. This includes recreational sport shooting. There are options to provide shooting opportunities while reducing conflict.

Specific to the Clyde Summer Home Group recreation residence area, I recommend a minimum $\frac{1}{4}$ mile buffer zone around permitted sites. This preserves the recreational character of the intended use by minimizing extreme noise pollution and ensuring quiet enjoyment by permittees.
