Title:

Comments: Shooting at night, shooting at first light, Bullets, Pellets, flying through air while standing near garage, Multiple groups shooting across street from house sounding like war zone. We've called in 2 fires, people shooting exploding targets. Shooting can go on all day all weekend. We live across the street from forest service trail 343, people set up just around the corner to shoot, Canyon empties out directly into our property the sound bounces off the ridge behind our house you can hear the shooting inside our house with all the windows shut. Trail 343 is starting to look like Turkey Tract area as far as all the trash Left by the shooters. the only way to file a complaint is through teller county sheriff due to the fact the forest service code enforcement is impossible to contact

While bullets fly in all directions on both sides of 343, you have this trail open to hikers, 4-wheelers, and horseback riders. From our living room window we have witnessed shooters making new trails to ridge top setting up and shooting south several hundred yards. We feel if this situation goes unaddressed some one will end up in the cross airs possibly ending fatally.
