Title:

Comments: I am totally in support of this project. The damage done by NOT logging has become obvious as we only have to look at California and Oregon to see the effects forest fuel loading causes. We need to complete this project, not only to protect our homes and businesses, but to put money in the local school districts. Most people don't know that a portion of money earned from federal logging is required to be returned to local district there-by taking some of the burden from property tax payers.

Please complete this project for the good of all the people in Bonner County.
