First name: Matt

Last name: Gingerich

Organization: NV Energy

Title: Manager, Land Resources

Comments: Farm Bill 8630 -- Vegetation Pilot Projects (FSM 2740)

Vegetation management is critical to the safe and reliable operation of gas and electric facilities. NV Energy is supportive of this amendment. It is noted that this does not apply to those facilities that have an existing special use permit. While many of our permits are covered by operating plans that detail vegetation management, some do not have a plan. NV Energy would like to see this pilot project extend to those permits not covered by an operation plan.

NV Energy appreciates the opportunity to provide comments on this directive.

Thankyou.
