Title:

Comments: I agree with the opening of ranges to allow more people to consolidate their target shooting but I object to proposing to close the majority of the forest to target shooting. I have been target shooting for years and have always looked for a backstop, with plenty of distance from roads, trails, campgrounds, and houses and have always cleaned up my brass and protected the trees. Target shooting in the forest is one of the last freedoms I have and I object to the majority of the forests being closed.
