Comments:

I 100% support any and all measures to reduce shooting in the National Forests. There are more people than ever enjoying our National Forests making it even more dangerous for those shooting guns and increasing the potential for accidents to happen. I fully support shooting ranges that are monitored and safe. People discharging lethal weapons in our National Forests cannot guarantee they are not going to hit bystanders. Please limit shooting in these areas especially those close to cities and towns by any means possible.
