Comments: I would hate to see you limit or worse yet ban sport shooting on public lands.... Most of the folks who sport shoot are respectful and safety is their #1 concern. Do not limit or ban sport shooting because of the actions of a few. Set up a Hot Line to report abuse and make it easy and fast to report unsafe sport shooters.

While I shoot high powered rifles often, I also shoot muzzle-loaders as well. Most if not all shooting ranges are not set up for black powder sport shooting. The public lands offer the space needed to properly sight in and shoot rifles when safety is your first concern.

Making it difficult to sport shoot should only be considered where there is very close proximity to populated areas and not you should not just blanket the entire district because of some hot spots.

Respectfully submitted.
