Comments: I am so please to see that you are considering putting more limits on shooting. I have seen some particularly bad areas on Rampart Range where some beautiful large aspens are being destroyed. I would like to suggest not only requiring a certain distance required from trail heads, but also from the entire trail in general! I have been on the Lovell Gulch trail off Rampart Range Rd in Woodland Park many times when I have felt that people were shooting much too close by. I don't understand why shooting is even allowed where people camp, hike, drive, etc. It really doesn't make any sense.

Thank you
