First name: Edwin
Last name: Slade
Organization: Arizona Department of Environmental Quality
Title:
Comments: I have circulated your information to the Water Quality Division of ADEQ, and after careful review and based on the information provided, the project is likely subject to permitting under Arizona's Stormwater Construction General Permit (CGP) for the project duration. The CGP authorizes stormwater associated with construction activities (e.g., clearing, grading, and excavating) that discharge to Waters of the U.S., consistent with Clean Water Act requirements.
