Comments: Hi... I left some comments previously about the situation at the Harris Park shooting range. I'm mentioning one other observation that happened recently but did not include it in my previous remarks. My almost 30-year-old log home needed some aging windows to be replaced. I contracted with a window supply/repair company in Harris Park who worked several days at my place to replace the windows. He mentioned my project would be his last project. After years of living in Harris Park he couldn't handle the shooting range noise anymore. He reluctantly and sadly felt he had to leave.
