Title:

Comments: I have been hunting and target shooting in this state for 52 years and the disrespect for the National forest I see now is sickening. I cannot believe how much things have changed. A sad reflection on our society in general. My concern with these designated shooting ares is safety. A person has no idea who will be shooting next to them and how experienced or safe they are. It would be better to have organized and regulated shooting ranges although I realize this would be costly.
