Comments: I've been going to the 528G range with my husband. His non-profit 528g.org has cleaned the place up, dramatically, and has brought order and education to that shooting area. It has high traffic and is a valuable asset. All sorts of folks go there, including law enforcement, military, and family! Lots of kids learning to use the household firearm tools. Not only should it be maintained, the concept should be developed. Looking at your plans, my comment is add more pistol areas! The vast majority of those that come out are shooting with handguns. Archery is important and appreciated, yet with so many new gun owners, there is a strong need for many more pistol stations. Stations to help control the direction and keep order.
