Title:

Comments: I own 160 acres located near the NE end of NF 33. We are building a home there this Summer. In order to preserve a buffer of privacy and safety for my family, we urge the USFS to refrain from building any roads, within 2000 feet of the property line.

Additionally, our property line extends North across NF 33. This portion of land consists of 7 to 8 acres. I propose to the USFS that we trade the portion of land on the North side of the road for an equal amount of land on the South side of NF 33 adjoining our property. This would allow the USFS to execute all phases and strategies encompassed in the Mill Creek Dry Forest Restoration Project to all of the land North of NF 33 without asking for our permission.

Thank you for considering our request.

V/R,

Grant
