Comments: I strongly oppose the Good Neighbor Authority. Using state agencies to manage federal land is inappropriate and not at all in line with what the public expects of a public land management agency.

Stop turning forests into plantations. When you do, they burn hot and fast. Thinning does not reduce fire intensity. DO NOT take actions to increase the pace and scale of logging. Look at the fires in Oregon in 2020. Millions of acres of the most heavily managed state and private timberlands in the West burned. Don't create more danger, loss of human life, loss of homes, loss of natural resources.
