Title:

Comments: If I could pick, I'd suggest zero target ranges in forested areas. That seems unlikely, so I'd like to see this plan do more to buffer shooting around trails and wildlife habitat and limit hours.

I'd also like enforcement of specific shooting hours, cleanup campaigns/sponsored cleanup days (since in my experience target shooters rarely clean up anything), and again, I'd like to see this away from all forests and wildlife areas. An open range with a great back stop and easy access from our major highways would be best.

Thanks for the opportunity to offer my suggestions!
