Comments: I don't know what is wrong with the USFS. How does the USFS come to the conclusion that it has a right to destroy family operations by reducing the rights associated with family operations? Why does the USFS assume it has a right to force conservation easements on a family operation or force a farmer into a land trust? Is there every any thought given to how this violates the Fifth and Tenth Amendments in the Constitution? Does the USFS understand the devastation this will cause to U.S. citizens? Or doe the USFS just sit back and think about ways to force its ideology, not cows, onto citizens. Every rancher knows that cows do not harm the environment, that they are not a contributor to climate, but rather are used for the benefit of land, and people?

What can any citizen say that will put shame on you to stop these ideological changes? What does any citizen comment do to make you understand?

Do not make these changes in the rangeland management directives. It is only going to cause more contention with the government.
