Title:

Comments: As a frequent multi-modal (mountain bike, ski, run, hike, 4x4, etc.) forest user, I want all forest users to have access to the forest to enjoy recreational opportunities. I want my access to be protected and understand there are many users and interests other than my own. I hope that a designated area or areas for Target shooting is thoughtfully considered and implemented to ensure, most importantly, the safety of all forest users and continued access for all parties. From my personal observations on Rampart Range Road and Old Stage Road, there have been both examples of good and poor stewardship of the land. From what I have seen and experienced, no matter the interest group, as long as there is a cohesive group of core community members that are focused on positivity, education, and stewardship there are usually positive outcomes. For something with the potential danger of a shooting range I think it cannot be understated that having a community of users focused on safety, stewardship, and education is essential to successfully integrating any sort of public shooting area on shared public lands.
