Comments: My comment is quite simple - I like to shoot, but I also like to run, hike, bike, and camp in the National Forests. We need more good shooting ranges, especially those with a variety of distances from 25 yards out to 500+ yards. And they need to be easily accessible and low cost or free. I recognize the risk dispersed shooting brings to the public. I've seen too many people behaving recklessly with firearms on public land. But we need many more good opportunities for public shooting ranges if we want a well-managed, safe forest.
