Comments: As a regular user of the trails in Cheyenne Canyon and along Old Stage and Gold Camp Roads, the current dispersed target shooting policies are mildly concerning. Every trip I make up there, I see increases in environmental damage and litter. I have also been concerned for my safety before, hearing bullets whistle overhead due to the improper use of a safe backstop in the area of Frosty's Park.

I am also a recreational shooter in addition to trail user, and fully support the establishment of designated, controlled shooting areas. This will limit environmental damage and increase overall user safety. I would also propose entering a MOU with local shooting/hunting clubs for various designated shooting ranges, and hold them accountable for the cleanliness of the locations.
