Title:

Comments: I have used turkey track in the past to site in before hunting season and fire my handguns.

I quit going there about a year ago because i felt it was unsafe.

It needs clear firing lanes and safe backstops. Ultimately, it should be made into a supervised range with annual and day use fees.

I live near the range and the shooting on weekends is incessant, including bumpstock, automatic fire and exploding targets.

It would be a nice facility if it was properly managed.
