Comments: Closing roads will inhibit the recreational opportunities for outdoor enthusiast.

If closing roads and limiting access helps the fish you are going about this incredibly wrong. The best solution for saving fish is to close ALL fishing for 5 years. This will vastly improve the quality of fish saturation without affecting off road recreation. Please remember people need hobbies and recreation to fill their time. If this is about money and maintenance, then the priorities of our state governments ability to manage funds is flawed. Access to state and federal land is a given. Taking it away a little bit at a time seems right, but the sum is completely wrong.
