Comments: Living in the Plain valley for 25 years and seeing the yearly threat of fires in this community makes everyone on edge. The fire that threatens Plain will happen, the question is when. The slash piles need to be taken care of within a year, not 5-10 years. Isn't that fuel on the ground? The forests need to be thinned, the landowners need education on how to make their property firewise, the public recreating in this area need to be aware of the summer burn bans, the danger of driving off road, etc.
