Comments: I am writting to request that motorized access, mountain bikes and on snow
motorized access stays open as part of the Upper Wenatchee Pilot Project #49124. This area has long been given
motorized access, primarly single track dirt bikes.
The area has functioned like this and served a broad range of user groups for many years. Why would you need to alter that well established track record.
Any effort to restrict access by user groups would not be supported and I would feel betrayed by the Forest Service. This is public land not your land. Your duty is to manage it as best as possible for public use.
Further depleting motorized access also causes over use in the areas left motorized recreation.
