Title:
Comments: We have had a cabin on Lake Wenatchee since 1977 so have seen several devastating fires that destroyed large areas of surrounding forest. We have seen the marked improvement and healthy restoration of our surrounding forests that the Forest Service has done. We admire the forests you have treated driving the Chiwawa Loop road or Plain highway. We also see the neglected overgrown forests that surround us. We have followed the advice of you professionals in making our own property fire safe and taken advantage of the chipping services etc. Others will outline all the areas that will be impacted if this work is not done. Our family strongly support your plan. Thank you.
