Comments: I am writing in response to the letter I received concerning feedback to the Forest guidelines.
First thing that is not clear is, I agree with that we can run grandchildren's as well as our children's cows. One thing that is not clear is the fact of step-children and step-grandkids. This needs to be stated somewhere to clear things up.
Another point I would like to see is re-instatement of a permit. Our permit was suspended approximately 30 yrs ago for a rule violation that we did. I have no problem with the suspension because we were in the wrong. I would like to see some sort of reinstatement, whether it is a fine or buy back of the suspended part. After so many years to be able to apply for reinstatement of some kind.
I agree with the LLC and limited partnership but I do think we need to keep some form of commensurability requirements so that trader cattle people have to keep cows for a certain period of time.
I think that in the case of drought or other natural disasters that the requirements should be relaxed, but to just take a hold over the rules are fine the way they are
