Comments: The second amendment is under constant attack by many groups that aren't educated enough on the subject to create legislation against it. Gun violence stats are skewed to include suicides which make up a majority of all gun casualties. Last I checked people that are suicidal will find other ways... Please stop pushing us to the fringes of society when people jump through your legal hoops to own firearms as it is. Stop criminalizing and vilifying people that want to shoot for sport, protection, or to uphold the principals on which this country was founded. There is a level of mutual respect in the 2A community for everyone despite skin color, race, or religion to exercise their rights as a free man. There is also a sense of community that unfortunately has been eroded by a toxic society that can't seem to accept differing ideas. It's shameful. I am sure as a community we will respect any rules or guidelines set forth by the forest service but shutting us down would be a travesty. Thank you for your time and consideration.
