Comments: I have added some micro comments on various road closure proposals. I wanted to add a note of over all support for this project and it's goals. The Lake Wenatchee basin is a very special place and we would all benefit by managing the forest back into a more natural balance. You only need to drive west from the Y camp and look at the forest to the right which was thinned 10 years ago and the forest to the left towards the lake that hasn't been thinned to see the problem of un-managed 2nd growth.

There will be challenges, compromises and a lot of work to be done but we are very supportive of this effort.
