Title:

Comments: I am opposed to dispersed target shooting in the forest. I have been to the sites where it takes place and am disgusted with the trash, destruction of trees and other vegetation and by the clearly bad choice of the locations where munitions can carry far beyond where intended. I am skeptical of the integrated management system being proposed. The management of the locations and proposed actions such as signage, parking restrictions, etc will surely be ignored. To support I would want significantly more detail on patrolling and enforcement with a written detailed commitment by the parties who will enforce.
